

ORBICULE UNDERCOVER

- **Sorry, this is Mac only**
- Orbicule Undercover
<http://www.orbicule.com/undercover/>
- Lets say your Mac is stolen;
 - *First off, I am sorry.*
 - 1. Orbicule will secretly transmit the IP and Router information,
 - 2. It will also take a screen shot (of the thief) with your built in camera and e-mail it to you every 6 minutes.
- Plan B.
 - 1. It will slowly dim the screen to make it look like a screen failure.
- Machine now sold or at the shop?
 - You can push a message alerting them it's a stolen machine. It will also pop the volume to the loudest and will yell **STOLEN**
- **\$49**
